RECEIVED

SEP 20 2002

TECH CENTER 1600/2900

Sir:

RESPONSE

In response to the Office Action mailed March 18, 2002, Applicants answer as follows.

In the Claims

Please cancel claims 9 and 10.

Please amend claims 1, 11, and 13 as follows:

1. A method of determining the ability of a test compound to affect the activity of ABCA1 protein, said method comprising the steps of:
- introducing labeled substrate into ABCA1-expressing cells;
 - adding a test composition comprising said test compound to a first portion of said cells, and adding a control composition to a second portion of said cells, wherein said control composition is essentially identical to said test composition except that said control composition does not include said test compound;
 - measuring the level of efflux of substrate from each portion of said cells by separately combining said first and said second portions of said cells with an efflux
